T. Boone Pickens' Energy Independence Pledge

We will no longer stand by and watch as America's national security and economy become more dependent on the unstable foreign nations that we rely on for nearly 70% of the oil we use each day.

We spend nearly \$700 billion every year buying foreign oil, which represents the greatest transfer of wealth in the history of mankind.

The new President and the 111th Congress need to enact an energy plan that reduces our foreign oil dependence by at least 30% within ten years.

This plan must include proven American technology and resources; the development of new energy sources; and the expansion and modernization of the national electrical grid to transport renewable energy to homes and businesses.

Delaying any further means tacit support for continuing America's addiction to foreign oil.

I join with T. Boone Pickens and his army of supporters in calling for an Energy Independence Plan to be enacted within the first 100 days of the new administration.
